

**CAD** computer software for family houses

**MIAO**

all inclusive package processed in 6 hours

**New 2008  
version**

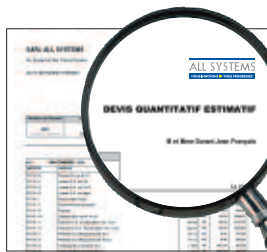

A fully comprehensive software complete with accurate drawings and calculations

Miao's key strengths are to produce a complete draft project in 6 hours using only one operator.\*.

## DRAFT PROJECT

A fully comprehensive and accurate sales product highlighting your company's creativity. Its huge appeal lies in the attractive layouts, visual cross sections, interior and exterior perspectives. You can even go on a virtual tour of the house.

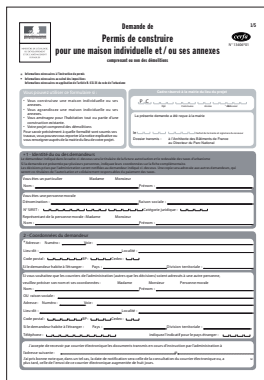

## COSTING

With the user-friendly accurate bill of quantities you can calculate precise estimates and building specifications.

Easy to follow, the programme uses building materials such as walls, beams, roofs to illustrate the construction (no plans or drawings)

The cost of building materials ensures that your housing projects will be sold at a fair price and enables you to store orders for building materials and co-ordinate supplies to the building site.

## BUILDING PERMIT

The software programme produces external structure positioned on the site and all calculations for elevation, cross sections, levels, roofs, landscape integration, which ensures a complete file for the planning permission office to study.

With this software the new PC form and slip are automatically filled in and can be printed from the project data base.

## THE ENVELOPE

Once you have allotted the building materials to the selected building contractors you will be able to print both the customized project contracts and the contract amendments.

You can also print the progress report and the payment proposals.

\* Average time operated by skilled civil engineer technician.

## FINAL DRAWINGS

In a few minutes the overlay electrical diagram will be inserted and you will be able to print out a reliable detailed drawing and calculate the estimated external structure.

## BUDGET

This is a budget guideline for the project managers. It enables them to monitor each building site daily. To control projected margins with current and future building costs.

## FLEXIBILITY

The CAD data base instructions for drawings and calculations provided with MIAO contains over 14,000 products including regional building specifications. Totally custom designed it can be adapted to your design work, calculations and drawing methods.

## COMPLIANCE

Designed to be compliant with other CAD building software MIAO will automatically process topographic data transferred to your PC from your land surveyor so you can plot your construction on the site.

## CUSTOMER SERVICE

Once you join All Systems our mission does not end there, it is only just starting. A 9-day training course at MIAO's is provided by civil engineer trainers coupled with a dedicated help-line and on-site assistance to guide you in customizing your database.

## AT ALL SYSTEMS WE CARE FOR YOU

A fast and substantial return on investment. Compared to your annual turnover your investment in the MIAO software package is minimal. This unique excellent value product is efficient in processing, accuracy and profit margin maintenance. A true friend !

## A 100% French Design

Launched and marketed by All Systems, a French high-tech company located in Grenoble.

MIAO has been the CAD family house software leader for building contractors for 20 years.

Today over 2500 civil engineers use the system daily in their design offices which is tremendously beneficial for their design staff.

## Welcome to All Systems Club

Become a member and benefit from our products.

- Display your house and land on our website free of charge. [www.allomaison.fr](http://www.allomaison.fr).
- Display your show house and expertise in the first French virtual village (available 2008) Thousands of internet users will visit our site and we will provide feedback with details of your prospective customers.
- Your MIAO civil engineer technician is trained in 9 days and if you need to have someone stand in for the technician at any time due to holiday or sick leave, you can log onto our network and help line.
- Get our newsletter with the latest information on the family home sector.
- Be the first to know about the latest All Systems technology.
